

2020 Non-Creditable Pharmacy Plans for Washington

Medicare regulations require employers that provide prescription drug coverage through a group-sponsored health plan to disclose whether their prescription drug coverage is “creditable” to their Medicare-eligible employees and, in some cases, to their retirees. Coverage is defined as creditable when its actuarial value equals or exceeds the standard Part D prescription drug benefit.

In general, the actuarial value of the benefit is determined by whether or not the prescription drug coverage is expected to pay out, on average for all participants, at least as much as the standard Part D coverage would pay. If the coverage does not equal or exceed the value of the standard Part D benefit, the pharmacy plan is considered “non-creditable.”

Health Net has assessed its 2019-2020 commercial pharmacy plans¹. Most of our pharmacy plans meet or exceed the actuarial value of the standard Part D benefit, and are therefore considered "creditable." However, there are some plans that have been deemed non-creditable.

You will find the list of non-creditable plans on the second page. Please note that HSA-compatible pharmacy plans can be both creditable and non-creditable, depending upon whether the plan is primary or secondary to Medicare.

If you do not find your current commercial pharmacy plans in the list below, it is considered creditable.
